AdmiQ (v.4.0.0) – New browser-based version!

- AdmiQ is now available as a web-application
- The new AdmiQ contains mostly the same functionality as the old AdmiQ application. Major changes:
 - Member Belts must be handled (created, edited and deleted) by the user at My IQNITER and is not available in AdmiQ anymore
 - ‘Rental Belts’ are substituted by ‘Club Belts’ and have basically the same functionality
 - Added Training Data (Workouts) form instead of viewing PDF-files, which are not available anymore
 - Added option for chain administrators to edit Studio Settings on fitness chain level (Studio Settings on fitness chain level are inherited to all fitness clubs within the chain)
 - Added fitness club statistics, such as Club Totals, Club Achievements, and Club Top Rankings

My IQNITER Portal (v.3.3.0)

- Added form for submission of sensor claim requests

Account Portal (v.1.2.0)

- Added support for delete of user account

Mobile App (v2.7.3)

- Added showing Hearts on Workout Tracking view)
- Added link to delete user account
- Improved user information when saving and when no Internet connection
- Fixed that default FTP value was always used
