IQNITER Studio v3.10.0 (Cardio Training)

- Layout flexibility.
 - Optimized performance when switching layouts, particularly when toggling Session Profile layout on/off (F3)
 - Added 'drag-splitters' so the Group Screen and Instructor Panel layout can be manually adjusted on-the-fly. Either individually or the Group Screen follows the Instructor Panel layout (double-click on the Instructor Panel splitter).

- Video Center layout:

- Optimized layout of exerciser tiles around the video in the middle.
- Added button in the lower right corner of the video area for showing the video in the center vs behind the exerciser tiles.

- Bug-fixes:
 - Fixed that exercisers were not arranged correctly when switching to and from Team Challenge.
 - Now exerciser tiles do not rearrange when the Next Step bar shows.
 - Leaderboard toggle is now reset when logging out and logging in again.
 - Minor styling improvements

IQNITER DesiQner v3.10.0

- Added button in upper right for showing/hiding the window frame.
- Added new icon for Exerciser Position legend (different from standing and seated icons) and added text for Free position.
- Bug-fixes:
 - Fixed memory error when calculating Energy graph.
 - Fixed filtering issues related to Copy Stages view.
 - Translation and spelling errors.
